

Successful Stockholm Boat show for Victron Energy

As a part of new expansion activities in Sweden, Victron Energy has been present at the 71st Stockholm International Boat show. The show has been an enormous success and the new MultiPlus booth attracted a lot of visitors and attention.

Victron Energy presented together with Storebro Energy Systems and Odelco the brand new 'giant MultiPlus' booth, which has resulted in many positive reactions from the visitors. New products such as the Easy Plus, the new compact battery chargers and VE.Net have been presented at the booth.

Sales manager Johannes Boonstra speaks of an extremely successful show. *'We were pleasantly surprised by the number of visitors at our booth. Especially the Easy Plus, our newest all-in-one power system, attracted a lot of attention. We made contact with a good number of potential new trade customers as well as handling many detailed enquiries for power systems. I am very happy with the results of the show!'*
